The foregoing Committees are alphabetically arranged, to choose their own Chairman, and meet on their own adjournment.

## · Annual Report

OF THE

### MANAGERS

OF THE

# Western Pennsylvania Hospital.

To the Honorable President and Members of the Board of Public Charities:

Gentlemen:—On behalf of the Board of Managers of the Western Pennsylvania Hospital, I have the honor to lay before you a statement of its affairs for the year ending September 30, 1892.

Adopting the precedent established, I first refer to the department for the Insane, at Dixmont, on the line of the Pittsburgh, Fort Wayne and Chicago Railroad, eight miles below the city of Pittsburgh. The farm at Dixmont comprises about 375 acres, (purchased by individual subscriptions) and is well adapted for the purpose to which it is devoted. The land is for the most part precipitous hillsides, almost mountainous in character. A considerable portion is heavily wooded with forest trees. The portion that is capable of cultivation is managed so as to yield abundant crops of berries, fruits and vegetables, and in the proper places ornamental trees, shubbery and flowers adorn the premises, and render them very attractive. The character of the ground and its inaccessibility, protects the patients from inquisitive and annoying visitations, and affords them the desired and necessary scclusion. Extensive walks and roads wind throughout the farm, from which magnificent views, up and down the beautiful valley of the Ohio river, may be enjoyed by our people in their rambles for exercise and recreation.

The buildings, with the exception of the house for the boilers, pumping engines, and gas apparatus on the bank of the river, are located upon a plateau having a southern exposure and an elevation of some 200 feet above the river, where the air is dry and wholesome.

"Air is a dish one feeds on every minute and therefore it need be good."

The hospital proper is 750 feet long; is a main building in which are the reception rooms, offices, storerooms, kitchens, Superintendent's and Assistant Physician's quarters, and the chapel; on either side extend wings, respectively occupied by male and female patients. The building has capacity to comfortably accommodate 400 patients. To the eastward is a modern hospital building known as the "Annex," which will accommodate 125 male patients. Three other smaller The total capacity of the institution buildings shelter 75 patients. being therefore, sufficient for not more than 600 patients. laundry building, and engine rooms, are to the westward of the main building, and beyond them the barns, and houses for the farmer, and other employes. Thus, all the available building ground is occupied, and for this imperative reason the Executive Committee, which represents the Board of Management, has never seriously considered the question of extending the accommodations of the hospital by the erection of more buildings, in order to relieve it of its overcrowded condition. Our statistics show that on the 30th of September, 1892, there were 740 patients under charge. It is a matter of congratulation, however, that this relief may be brought about, soon, when the asylums contemplated by the State for the chronic insane are built; and the department for the insane that Pittsburgh will provide at its magnificent municipal buildings on the new city-farm is ready for its unfortunates.

The opportunity for the effective care and treatment and cure of the insane that our Board so earnestly desires, is now to a great extent precluded from force of circumstances, namely, the hospital's over-crowded condition, and for this unavoidable and compulsory reason, the purposes contemplated by the good men who founded the institution some forty years ago are not fully realized.

At the beginning of the year, October 1st, 1891, there were 756 patients in the Hospital; during the year 233 were admitted, the total number under treatment was 989; of these 75 were discharged restored, 48 were improved, 9 unimproved, and 117 died. There were remaining in the Hospital September 30, 1892, 740 patients. The average number under treatment during the year was 749 the highest number was 759 and the lowest number 733.

The general health of the patients was good, though the high deathrate above reported—which is fully accounted for, and explained by the Superintendent in his report—would seem to contradict this statement.

Typhoid fever, referred to in our last report, continued to exist last winter and early spring, but was of a very mild type, though none the less a matter of serious anxiety to the Board and Physicians, who were unable to discover the source or cause of its existence. But two deaths occurred from the disease named, and for some months past it has disappeared.

On the night of January 21st, 1892, John R. McAfee, an aged, feeble patient, was strangled to death by a fellow patient named O. A. Williams, who was committed by order of the Court of Washington County. No history of his case accompanied his commitment, but the hospital authorities were assured that he was a quiet, harmless man, and there were no reasons for suspecting his homicidal tendencies. He was assigned to a bed in a dormitory, in which several other patients slept, which was necessary, from the fact that all single rooms were occupied by one, and in some instances by two patients. During the night Williams got up, and deliberately choked McAfee to death; then attacked another patient, and doubtless would have accomplished his purpose, had not the night watchman discovered him in the attempt and prevented it. Superintendent promptly notified the Coroner, who visited the Hospital and after making a careful inquiry into the case exonerated the officers and attendants from blame or censure.

Another case that attracted considerable newspaper notoriety, was that of John McClarren, a patient brought to the hospital from Cambria County, by order of the Court, in May, 1892. He was suffering from Acute Mania, and died four days after his arrival. When received, bruises were discovered upon his head and body, and a consequent post mortem held in the presence of a visiting physician, and several members of the Board, developed the fact that his skull had been fractured in three places. The Coroner was notified in this instance also, and held an inquest, which cleared the hospital of all responsibility for the patient's injuries and death.

The Receipts during the year, were:-

Appropriations from the State, for eare and treatment of indigent insane, - - - - \$ 69,665.34

And from individuals, and public authorities, - 80,555.20

Interest from Endowment Fund, (to be expended for improvement and adornment of grounds,) - 1,300.00

The Expenditures, for maintenance of hospital, payment of salaries and wages, etc., were, - - - 153,619.75

No permanent improvements of importance were made, aside from a new roadway at an easier and safer grade up the hill to the buildings, and the renewal of fencing about the property. The usual and necessary repairs of eourse were carried on.

I regret to report that the much needed new barn, has not yet been built, but a very competent committee has this matter in hand, and by its direction much material for foundations and walls has been taken out of the quarries on the hospital property. The next annual report will certainly inform you of the completion of this very important improvement.

Anticipating a possible visitation of Cholera last August and September, when the country was threatened with the pestilence, the Executive Committee promptly considered the danger, and ample provisions were made for the care of any cases that might occur at the hospital.

Dr. W. K. Walker, the junior Assistant Physician resigned in June, to accept a position in the University Hospital, in Philadelphia. Dr. J. Moorhead Murdock, who was a member of the Resident Staff of the Medical and Surgical Department of the Hospital was chosen to fill the vacancy, and performs his duties very satisfactorily.

You are doubtless aware that the immediate management of the Hospital is committed by the Board for the sake of convenience, and the expedition of business, to an Executive Committee, which faithfully performs its duties from year to year. The hospital has been visited weekly with very rare exceptions, and often more frequently, and no business of any importance has been transacted except at meetings at the hospital, at which quorums were present. When it is understood that the gentlemen of the Executive Committee are engaged in active business pursuits, that a visit to the hospital occupies the greater portion of the business hours

of a day, and necessitates a railroad journey of nearly twenty miles, their services may be more fully appreciated and valued.

The Superintendent together with his assistants and other employes have industriously attended to their duties, as the condition of the patients, the hospital, and premises fully prove.

# THE MEDICAL AND SURGICAL DEPARTMENT IN THE 12TH WARD, CITY OF PITTSBURGH.

The previous Report indicated that 2,318 patients were under treatment. During the year just ended 2,275 patients were treated. The number in the hospital October 1, 1892, was 171. The average daily number was 205. The total number of patients shown by the books from the opening of the hospital to the date of this report is 25,199.

The total number of days of hospital occupancy during the year was 74,522, or, by free patients 43,469 days, by patients who paid in full or in part 21,342 days, and by soldiers 9,711 days. The estimated cost of each patient, per diem, was \$1.13. The cost of food per diem was \$0.33.

Our statement shows that a fewer number of patients were received, than during the former year. This is accounted for by the fact that the utmost care and discretion were exercised in admitting patients into the hospital, while at the same time I may safely say, that no acute case of sickness or injury was turned from its doors. Undoubtedly this course of management is the proper one, yet it would have been

gratifying to our Board could greater latitude have been allowed this department of the hospital in doing its good work, and that it had been permitted to serve every possible worthy applicant for aid that applied. That liberality which we all, prompted by our feelings, would have gladly exercised in this respect, was hindered by a consciousness of its embarrassed financial condition, and forced upon the management the most rigid economy in the administration of its affairs. It has therefore been necessarily deprived of many needed refurnishments, conveniences, and improvements, that would greatly add to the comfort of the patients, a better conduct of its household, and render the buildings and grounds more ornamental and attractive.

During the past year the indebtedness was reduced about \$15,000, for the most part, by contributions received from friends, and at present it is about \$88,000, upon \$58,000, of which (being borrowed money,) interest is paid.

The Legislature will be asked at its next session, with your approval, for appropriations to the extent of \$177,000, namely: for the payment of officers' salaries, and wages of employes, and maintenance of patients, for the two fiscal years commencing June 1st, 1893, \$90,000; for the sum of \$50,000 to pay off the loan due the Pennsylvania Railroad Company, which was obtained by the Board, to liquidate the pressing demands of creditors for purchases of necessary supplies for the maintenance of its sick and helpless patients, (chiefly Pennsylvania soldiers) during, and previous to the years This loan was negotiated by pledging hospital 1883 and 1884. This application will again be property to the Railroad Company. made, with the expectation that it will be realized, as you are aware, it was on two occasions already approved by your honorable body, and passed by both branches of the Legislature, but failed to become a law through the exercise of the veto power on the part of ex-Governor Beaver; for the purpose of reducing the existing indebtedness which was incurred in maintaining the Hospital, paying interest, &c., &c., during 1889, 1890, 1891-92, the sum of \$17,000; and for the further sum of \$20,000, for a new set of steam boilers, and a new house for the boilers, a new laundry, and a convenient and centrally located kitchen.

On September 1st, a training school for the education of persons desiring to become nurses was established by the Executive Committee, with the approval of the Board. The school is governed by a subcommittee of the Executive Committee, members of the Medical and

Surgical Staff and the Superintendents of the hospital and the school. Miss Mary McMillan, a graduate of the Bellevue Hospital School for Trained Nurses, in New York, was made Superintendent, and installed in charge. The general need of a better system of training, and educating nurses, has for a long time been recognized, and considered by our Managers and Physicians and Surgeons. At length the initiative has been taken, and there appears to be no reason why great and beneficial results to the hospital, and to the community as well, may not follow; for The Western Pennsylvania Hospital possesses peculiar advantages from its large and efficient staffs of Doctors, each eminent in the science and practice of medicine and surgery, and in the treatment of mental and nervous diseases, who are enlisted in the promotion of the training school, and will co-operate in the education of its pupils. All recognize the fact that competent nurses are in many instances as important to success in cases of sickness, and injury, as competent doctors, and the want of such competent nurses is by no means confined to the hospitals only, but is often experienced in the homes of the rich, as well as in the homes of the poor. I trust the time may come, and this is my excuse for dwelling upon the subject of the school, when some generous and kindly disposed philanthropist may choose to provide our hospital with a large and suitable building, on our ample grounds, equipped and fitted out with all the necessary medical and surgical appliances, and instruments, with a library, laboratory, lecture rooms, dietkitchens, dormitories etc. etc., wherein a school may be conducted in the most liberal manner for the practical education of men and women nurses.

The patients have had every attention that skillful medical and surgical science could devise for their comfort and relief. Their food was invariably of the best quality the markets afforded, and was carefully prepared and served. The property has been diligently looked after, and the evidence of good housekeeping was manifest throughout the building.

#### THE ENDOWMENT FUNDS.

The Endowment Fund belonging to the Department for the Insane at Dixmont, was not increased and remains, - - - - \$ 23,000.00 The Fund belonging to the Medical and Surgical Department, was increased \$5,000 by the bequest of the late Richard C. Gray, and is now, - - 305,816.67

#### THE TRUST FUNDS.

The "Brewer Fuel Fund," and the "Crawford Fuel Fund," have yielded sufficient income to provide fuel for all the worthy poor of the community, and the Committees in charge of the purchase and distribution of coal have performed their duties judiciously.

The Brewer Fuel Fund is, - - - \$ 77,367.30 The Crawford Fuel Fund (increased \$3,000 during past year,) is, - - - - - 15,000.00

For details, statistics, financial statements, and much other interesting matters, I must refer to the reports of the Executive Committees, the Superintendents and the Treasurer. These are now in preparation and accompany this report.

The Board continues to entertain entire confidence in the Superintendents, Dr. H. A. Hutchinson, of the Department for the Insanc at Dixmont, and in Mr. W. A. Cowen, of the Medical and Surgical Department, as well as in their assistants, and other employes, nor does it overlook the obligations due the Medical and Surgical Staff, to whom it is much indebted for the high reputation the hospital has attained. Therefore, to all of them, I hereby tender the acknowledgments of the Board, for the harmony that has prevailed, and the success that has crowned the operations of the Institution during the past year.

## In Memoriam.

William Thaw, Jr., was born in Pittsburgh, December 13th, 1853, and died in Cologne, Germany, September 3d, 1892. He was for years an invalid, yet his cheerful and happy disposition, and remarkable social qualities, made him a general favorite among his acquaintances. He was engaged in active business till the time of his death, being Chairman of the Hecla Coke Co. He was also Director in several railroad companies, a Trustee of the Western University of Pennsylvania, a Trustee of the Deaf and Dumb Asylum, a Director of the Bank of Pittsburgh and an active and interested

member of Scientific and Mechanical Engineering societies. He was a member of the Brewer Fuel Fund Committee, and had charge of the distribution of the coal on the north-side of the Allegheny river.

James I. Bennett, was born in Venango County, Pa., and died, on October 11, 1892, aged 73 years. He had been one of the leading manufacturers of Pittsburgh, a public spirited citizen, was one of the promoters of the Pittsburgh & Lake Erie Railroad, and at one time the President of that company.

Charles Arbuthnot, a Life Manager, and one of the most liberal contributors to the hospital, was born in Ireland, in 1816, came to this country when 20 years old. He died October 5th, 1892, at his home in this city. He was one of our foremost business men, and was connected with many of our leading enterprises and institutions. He was an active and practical Christian, and as such, was a frequent visitor to the Medical and Surgical Department of the hospital, where he was accustomed to conduct religious services for the benefit of the patients.

Joseph Horne, another Life Manager, was born at Bedford, Pa. January 11th, 1826, and died at Dansville, N. Y., on October 19th, 1892, whither he had gone from his home in Allegheny in search of rest and restoration to health from prolonged illness. He was a leading merchant of Pittsburgh, a kind agreeable gentleman, and a liberal contributor to charity, the hospital being a frequent recipient of his bounty.

All of which is respectfully submitted.

J. A. HARPER,

President.

**N**ovember, 1892.

# Report of the Executive Committee

OF THE

# Department for the Insane at Dixmont.

To John A. Harper, Esq.,

President of the Western Pennsylvania Hospital.

DEAR SIR:—The Executive Committee of the Insane Department at Dixmont, have little to report for the past year, except in commendation of the officials of the Institution for the faithful discharge of their respective duties.

More than the usual amount of labor has been expended on the improvement of the grounds and roads leading to the Hospital, and a very great improvement in the grade of an important portion; this, though graded, is unfinished. Other improvements about the barnyard are in progress, and preparations being made for the required new barn, which it is expected will be entirely finished during the eoming year.

The advantages seeured in the generation of the steam at the pump house on the river bank, for all the purposes required in the buildings, have, after a trial for a year, exceeded the anticipations of the Committee.

A large amount of repairs to buildings and furniture have been made. For ordinary repairs, \$5,723.24, and for extraordinary repairs and improvements, \$1,581.05 have been expended.

All the buildings are in the usual good repair—a considerable annual expenditure being required for this purpose.

It may not be amiss to state that on the 27th inst., the date of the last meeting of the Executive Committee, and being subsequent to the annual report of the President and Superintendent, there were in the Hospital seven hundred and seventy-one patients, being the greatest number there has ever been, all being as comfortably provided for as the crowded state of the Hospital will permit.

The Committee have, at their regular monthly meetings, carefully examined all bills and accounts. drawn warrants on the Treasurer for the same, thus liquidating all claims against the Hospital regularly each and every month.

Respectfully submitted by the Executive Committee.

WM. P. TOWNSEND,

December 31, 1892.

Chairman.

#### M. W. McMILLAN, Treasurer.

Eight thousand dollars, (\$8,000) borrowed by order of the Board in 1890, on the obligations of the Institution, remain unpaid.

We, the undersigned, the Finance Committee, appointed for the purpose, have carefully audited the accounts of Mr. M. W. McMillan, the Treasurer of the Western Pennsylvania Hospital, (Medical and Surgical Department,) and found them correct and satisfactory as above presented, showing the balance on hand October 15th, 1892, to be seven hundred and twenty-two and  $\frac{44}{100}$  dollars.

ALEX. NIMICK, JNO. W. CHALFANT, C. ZUG, GEO. A. BERRY, WM. ROSEBURG.

# Endowment Funds.

To the Board of Managers of the

Western Pennsylvania Hospital.

#### GENTLEMEN:

We have examined and counted the securities belonging to the Endowment Funds of the Western Pennsylvania Hospital, in the possession of the Treasurer, Mr. M. W. McMillan, and found the same to be correct.

These consist of securities belonging to—

### The Department for the Insane at Dixmont.

One Bond of the Allegheuy Valley Railroad Company		00
Nine Bonds of \$1,000 each, of the Borough of McKeesport, (Water Improvement Loan)	9,000	00
road Company		00
	\$23,000	00

Securities belonging to—

### The Medical and Surgical Department of the Hospital.

# REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

### REPORT

OF THE

# Physician and Superintendent

OF THE

## HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers:-

Gentlemen:—The following report of the Department for the Insane for the year closing September 30, 1892, is herewith presented:

From the accompanying statistical tables it will be seen our wards continue to be greatly crowded in excess of their capacity, though the total number of patients under treatment, I am glad to report, falls a little below that of last year, and for the year just closed numbered nine hundred and eighty-nine patients. Of these seven hundred and fifty-six were residents of the Hospital at the beginning of the year, since which time two hundred and thirty-three admissions are recorded, or thirty-nine less than the number received for the year 1891.

The total number of those discharged is the same as for the previous year, in all two hundred and forty-nine. Of these seventy-five were returned to their homes as restored, forty-eight were discharged in an improved condition, both mentally and physically, nine were unimproved, and one hundred and seventeen patients died.

Our daily average population was seven hundred and forty-nine, and the highest number attained upon any one day was seven hundred and fifty-nine, the lowest number occupying our wards being seven hundred and thirty-three. When it is remembered the Hospital has room to provide properly for but five hundred and eighty-five patients, the extent of our crowded condition is at once apparent, and of itself is sufficient reason to explain the continued small percentage of recoveries, and the high rate of mortality.

It is a subject for congratulation, however, the number of cures is considerably in excess of last year, and the number of deaths a little below.

Of those who died it may be noted, forty-three deaths occurred from consumption; from exhaustion of the chronic forms of mania, melancholia, and dementia, twenty-eight deaths; eight male patients died from paresis; eight from appoplexy; seven from Bright's disease; seven from heart failure and valvular diseases of the heart; and six from exhaustion of acute melancholia.

It is of further interest to know something of the length of time these patients were residents of the Hospital. One had resided continuously in the institution for a period of thirty years, five over-fifteen years, one thirteen years, one eleven years, one eight years, three over seven years, twelve over four years, twenty over two years, and seventeen one year.

Of those admitted one hundred and fifty-nine were received upon the certificates of insanity of two physicians as required by the Act. of June 1883, and whose formal request for admission was either signed by friends, or their respective poor authorities. Seventy-three patients were admitted upon order of the court, and one female patient, a non-resident of this Hospital district, by an order of transfer issued by the State Board of Lunacy.

Of those admitted, also, one hundred and seventy-three were new cases, or had never before been insane, thirty-seven were insane for the second time, eleven had had three attacks, one four, one five, and in ten instances the frequency as well as the history of their present mental condition was nuknown. One hundred and twenty-two represented the various forms of mania, ninety-five were melancholiacs, four dements, five paretics, and seven were classed as imbeciles.

From the character of their delusions, as well as their demeanor and history, the various complications were assigned in the following number of cases: Thirty-three were regarded as suicidal, thirty-nine as homicidal, one was committed to the Hospital from the Western Penitentiary as an insane convict, while seventy-eight were unclean in person or habits.

In the case of a little boy twelve years of age committed to the Hospital from Cambria county as an epileptic, it was deemed prudent after a correspondence with Doctor Kerlin, Superintendent of the School for the Feeble Minded at Elwyn, Pennsylvania, to send him to that institution, and which was done in the hope the association with other children of his age, and the training he would there receive would do more for him than was possible here.

Another case of peculiar interest was that of a male patient committed to the Hospital from an adjoining county, who prior to his admission was accused of placing obstructions upon the railroad. At the trial following his arrest he was adjudged by the court as insane, though not without serious doubt as to the correctness of the verdict, and thereupon sent to this institution. A brief residence fully established the fact of the man feigning insanity in order to escape the penalty of the law and for the avowed purpose of regaining his liberty by escape from the institution, and upon a subsequent court order he was discharged and sentenced to the penitentiary.

Every year witnesses a number of cases brought to our door who are aged and in an extremely weak and debilitated condition, and where this action upon the part of their friends or authorities committing them would seem to indicate undue haste, poor judgment, and but little consideration for the comfort and welfare of the patient. One death is recorded as due directly to fatigue in a weak and acutely insane patient, consequent upon the long journey to the institution, fourteen cases were received who were over sixty years of age, and two over eighty years; in the greater number of these old people whose insanity may be termed sinile dementia, their peculiarities were the result of advanced age and a broken down nervous system and with proper care or with the aid of a skilled nurse at home, no necessity would have arisen compelling them to be placed in an institution, and among strangers, there to pass their remaining days in confinement, and bereft of all their associations that at one time made life dear to them. Many of these patients died within a few days after their admission, and their history and death only confirms the belief of all observers upon this particular question in the treatment of the insane that such procedure upon the part of those committing them is bad and exceedingly fatal.

A number of patients during the year were, upon request of friends, and their assumption of all responsibility, granted a parole of thirty days, thereby enabling them to visit their homes and enjoy a brief respite from the tedium of asylum life. The wisdom of this feature of the present lunacy law cannot be over-estimated, as it is alike in many instances a means of affording great pleasure and

comfort to the patient and his family, and an ample opportunity to more properly form an opinion as to the progress or recovery from the mental affliction to which he may be a victim.

Especially so is this true in cases of long standing and chronic alienation, and in a certain class of patients whose delusions warrant them in the belief they are unjustly detained in the Hospital. It is a pleasure also to record the occurrence of no accident from the granting of these requests.

Of the large number of seven hundred and forty patients comprising our household at the close of the year it is a matter for serious reflection that only sixty may safely be regarded as curable. This percentage of probable cures is small, though little below that given for the entire population of the insane for the State, and should our present crowded condition continue unrelieved, the probability is the percentage of recovery would rather grow less, as with each succeeding year a large number of patients necessarily remain, who swell the number of its chronic insane and each year finds the Hospital as well as our inmates, older.

With the early erection and opening of the hospital for the chronic class at Wernersville, Pa., the coming year, it is thought a large number of our insane will there be removed and thus afford those remaining a better opportunity for recovery. This belief is still further strengthened by the fact of the city of Pittsburgh building a hospital for the accommodation of its own insane and which when completed will also deplete our overflowing population by the removal thereto of all those now resident here and chargeable to that municipality.

During the year we were again greatly annoyed by the recurrence of typhoid fever, which, for some unexplained reason, was confined principally to our employes of the female department. Every possible means were taken to ascertain the exact cause, but no satisfactory conclusion was obtained. While the number of sick greatly embarrassed for a time the proper management of the house, I am very glad to report with but two exceptions all made good recoveries. No other cases of acute or contagious diseases occurred, and we were spared suicide and many of the distressing accidents incident to so large a community whose very nature and eccentricities makes it particularly prone to such disturbances.

Every safe guard and precaution that experience and a long acquaintance with the insane suggest were exercised in our efforts to promote the safety, happiness and well being of all intrusted to our care, and despite these measures it is my unpleasant duty to record the death of one at the hands of a homicidal fellow-patient. In this instance however no blame whatever could be attached as due to lack of proper care, watchfulness, and discipline, and the officers and management of the Hospital were at once relieved by the Coroner of all censure.

During the year the Coroner was called a second time to examine into the cause of death of a patient received from Cambria county, and who died after a residence of but a few days in the Hospital. In this case as the former one the county officers were afforded upon the part of the institution a full, free, and cordial assistance at the inquiry, and death was ascertained to be the result of fractured skull the fatal blows having been given in self-defense before the patient's admission into our care. Both these fatalities were reported to the proper State officers immediately, and in the latter case, several members of your Board, a visiting physician, and a member of the Board of Public Charities were present at the inquest.

The usual care in the selection of young men and young women as attendants has been maintained though few changes were necessary; many of our older nurses still remain, and those added to their ranks within the year, give promise of zeal and efficiency in their new duties. Wherever errors have arisen either through mistaken judgment, or delinquencies upon their part, toward their patients or in an infringement upon the rules of the Hospital, the question involved has received consideration and reproof administered.

In the care and treatment of the insane no one but those engaged in the work has any conception of the requirements imposed upon the nurses, requiring oftentimes the greatest and most exacting strain upon their mental, moral and physical resources, and more so perhaps than in any other affliction is this remark true, as is well known the patients are entrusted to their immediate care, and to them belongs the responsibility whether the patient recovers or forever must pass his remaining years in a hospital bereft of reason and tortured by his unhappy delusions. To the end therefore of securing more proficiency and skill in nursing the insane the lectures referred to in my report for several years were continued during the winter months, and the results of this systematic course of instruction are most gratifying.

The medical attention bestowed upon our patients was supplemented also in the promotion of their social comfort and happiness, in engaging as many of them as possible in various out door pursuits and recreation, and within doors by frequent parties, music, magic lantern exhibitions and concerts. The wards were constantly supplied with all kinds of games, the daily and illustrated papers, magazines, and our libraries to which free access is given were substantially increased by the donation of books from friends.

Many of our household were induced to assist in the performance of the every day ward duties, others were employed in the laundry department, in sewing and fancy work. The halls and dining rooms were brightened, and presented a homelike appearance by flowers and plants from the green house, and ornamented by the purchase of pictures. The services of the Sabbath were observed and many of the patients enjoyed the privilege of attending church in the neighboring congregations as their inclinations dictated.

By these constant efforts much of the inactivity and indifference so frequently apparent as well as prevalent among female patients was overcome, though this problem in the moral treatment of the insanc is still one of greatest importance and most difficult of solution.

Of the work accomplished during the year mainly through the assistance of patients may be mentioned the building of the new road now known as Herron avenue, the repairing and grading of the Beaver road along the front of our property and the general repairs to all the roads over the farm. A number of the patients were constantly engaged in keeping our lawns and grounds in order, while others were employed in assisting in farm work. I may add that only such patients as in the judgment of the physicians would thus be benefited were urged to take part and in no instance was it made compulsory. All the patients so employed also were placed in the care of watchful attendants whose duty it was to see no one overtaxed his strength. By means of this systematic employment of so many male patients much good was accomplished in their improved condition of health, and contentment of mind, as well as substantial gain to the Hospital.

The sum expended for the year in conducting our various improvements and repairs was \$7,304.29 being very considerably less than for several preceding years. A large portion of this amount is

chargeable to the farm, in the rebuilding of our fences, repairs to out buildings, stone work, roads, and within the house to the laying of new hard wood floors, and making many minor repairs. A detailed account of this entire expenditure appears in the itemized statement of expenses following this report. The total cost of maintenance for the year \$153,012.41 also is less than last year, though in connection with this statement it may be added no change whatever was made in the standard of care and treatment of our patients. For all other particulars concerning our finances I respectfully refer you to the reports of the Treasurer and Executive Committee.

Mindful of the possibility of cholera appearing in our midst, by direction of the Executive Committee, suitable provisions were made for its proper accommodation and treatment, and it was also considered advisable to guard against the invasion of smallpox and vaccinate our household, which was done.

During the year the officers were made the recipients of many evidences of kindly sympathy and interest in their work, by the large number of friends of the Hospital who by their presence as well as by their generosity contributed so freely to the comfort and pleasure of our household, and it is with deep sense of gratitude I at this time extend them my heartfelt thanks. Our wards were provided with an abundance of reading material and over three hundred volumes were added to our libraries, a number of excellent plays, lectures and concerts served to pass many of our winter evenings most pleasantly. During the year also a camera was presented and it is expected much pleasure will be derived from its use by those of our patients interested in this kind of out door work. To the United and Presbyterian Boards of Publication we are indebted for one hundred and fifty psalm books and two hundred and fifty Gospel Hymn books to assist us in our chapel services.

Our grounds were greatly beautified by the presentation of a large number of ornamental shrubs, the gift of Mr. Wm. P. Townsend, of New Brighton, Pa. Mr. Wm. Knoderer gave the Hospital two hundred shade trees.

Doctor William K. Walker, the third medical assistant, resigned his position July 1st, to accept the appointment of resident physician in the Hospital of the University of Pennsylvania. The loss of Doctor Walker as a member of the staff of this Hospital was regretted by all, and he was not permitted to leave without

carrying with him substantial proofs of the high esteem in which he was held by the Managers and officers. To the vacancy thus occasioned, J. Moorhead Murdoch, M. D., of Pittsburgh, was chosen. In the acquisition of Doctor Murdoch the Hospital has secured a gentleman eminently fitted by experience and educational advantages to assume the responsibilities of his position as he has already shown in the thoroughness and ability in the performance of his duties.

My older associates Doctors George G. Graham and W. Brown Ewing, continue to occupy their respective positions and to them especially am I under renewed obligations for their ever ready and willing assistance to me, and untiring energy in promoting the best interests of the Hospital, and the well being, pleasure and happiness of our patients. Miss Eliza Hope with her assistant, Miss Black, still occupies the very responsible position of Supervisoress and Mr. Alexander Morrow and Mr. Johnson, that of Supervisors to the male department, and to these officers for their ability and faithfulness my thanks are also due.

Mr. William Knoderer, our farmer, gave renewed evidences for the confidence reposed in him so many years, and was indefatigable in the proper discharge of all business matters, and the department intrusted to his care. Mr. George Gray, the engineer, and Mr. Robert K. Allen, the book-keeper, Miss Bliss, housekeeper and Miss Jessie McCrum, who has charge of the laundry department, are also entitled to my thanks.

To you gentlemen, the President and members of the Board of Managers and the Executive Committee, permit me to extend you my grateful thanks, and invoking the assistance of Divine Providence upon the year in which we now enter, I close this report.

HENRY A. HUTCHINSON.

## Admission of Patients to Insane Department.

- 1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificates of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and conseut of the physician, in any succeeding quarter, no part of the payment shall be refunded.
- 2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their Agent accompanied by the Certificates of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.
- 3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.
- 4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes and one pair of slippers.
- 5. Each female patient shall have three calico dresses, four chemise, three pairs drawers, three pairs hose, three night-gowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.
- 6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluous articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

- 7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or her to the Hospital, and from whom minute, but often essential particulars may be learned.
- 8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is four dollars per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, and for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers, furnish evidence of their responsibility.

- 10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.
- 11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.
- 12. Visitors are admitted to inspect the Institution on any day (except Snnday,) between the hours of 10 A.M. and 12 M., and between 2 and 4 P.M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on the holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

- 13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne and Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west,) each day; (except Snnday) stopping at the Hospital Station.
- 14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.
- 15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

The friends of patients can communicate with the Institution by telegraph and telephone.

# Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of Insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane at Dixmont, No such patients will be received unless the Forms as given are fully complied with.

Order for the Reception of a Patient.

I, the undersigned, hereby request	you to receive
an insane person, as a patient into	your Hospital, believing that such
detention is necessary for h benefit	
ing the said	
	$\mathbf{gned}) \dots \dots$
	cupation
Degree of relationship (if any) or	)
other circumstances of connection	
with the patient.	)

Dated this......day of....., one thousand eight hundred and ninety..... To..... Superintendent of Western Pennsylvania Hospital for the Insane, at Dixmont, Pa.

with the patient.

### Physician's Certificate.

We, the undersigned residents of Pennsylvania, hereby certify that we have within one week prior to the respective dates hereinafter mentioned, at \*....., in the county of....., separately examined ....., of †....., and do verily believe that the said.....is insane, and that the disease is of a character which in our opinion requires that person shall be placed in a hospital or other establishment where the insane are detained for care and treatment.

We further certify that we have been actually in the practice of medicine for at least five years, and that we are not related by blood or marriage to the said....., nor in any way connected as a medical attendant or otherwise with the hospital or other establishment in which it is proposed to place the aforesaid.

sylvania, do	certify that the foregoing certificate was duly sworn or
affirmed to b	efore me, by the above named, and
on this	day of, 18, that the signatures thereto are
genuine, and	that the signers are physicians of good standing and re-
pute.	[SEAL.]

Physicians must make oath before a Justice of the Peace, and not before a Notary Public.

\* Here insert the street and number of the house (if any) or like particulars.

† Insert residence and profession or occupation (if any).

### STATEMENT.

If any particulars in this statement be not known, the fact to be so stated.

Name of patient, with Christian name at length..... Sex and age..... 3. Residence for the past year, or so much thereof as is known..... Occupation, trade or employment..... Parents, if living..... 5. Husband or wife.... 6. Children ..... 7. Brothers and sisters, and the residence of each of these persons..... 9. If not more than one of these classes is known, the names and residence of such of the next degree of relations as are known... A statement of the time at which the insanity has been supposed 10. to exist, and the circumstances that induce the belief that insanity exists ..... Name and address of all medical attendants of the patient during the last two years..... (Signed) Name.....

(When the person signing the statement is not the person who signs the order the following particulars concerning the person signing the statement are to be added, viz:)

Degree of relationship (if any) or other circumstances of connection with the patient.

### LUNACY LAW OF 1883.

Note.—The certificate must be signed by at least two physicians, and made within one week of the examination of the patient, and within two weeks of the time of the admission of the patient and shall be duly sworn to or affirmed before a judge or magistrate of the Commonwealth of Pennsylvania, and of the county where such person has been examined, and who shall certify to the genuineness of the signatures, and to the standing and good repute of the signers.

And any person falsely certifying as aforesaid, shall be guilty of a misdemeanor, and also heliable civilly to the party aggrieved. When patients are sent by order of Directors or Overseers of the Poor, they shall, in addition to the foregoing papers, fill up the following Order of Admission as required by the rules of the Hospital.

# W. P. HOSPITAL FOR INSANE, AT DIXMONT, PA.

77. 1. 11001
Will please admit the within named
***************************************

# Bond for Private Patients.

Know all Men by these Presents, That we,
in the county ofand
State of Pennsylvania, are held and firmly bound unto the Western
Pennsylvania Hospital, its successors or assigns, in the sum of One
Thousand Dollars, for the payment of which we jointly and severally
bind ourselves, our heirs, executors and administrators, firmly by these
presents: (Anddo hereby empoweror
any attorney of any Court of Record within the United States or else
where to appear for, and after one or more declarations
filed, to confess judgment or judgments againstin favor of
the Western Pennsylvania Hospital, as of any term for the above
penalty, with costs of said suit, and attorney's commission for collection,
viz: Five per cent. in case payment has to be enforced by process of
law; hereby waiving inquisition and condemnation of any property
that may be levied upon by virtue of any execution, which execution
may issue forthwith, on failure to comply with any of the conditions
thereof, and hereby waiving the right of exemption from levy and sale
of any and all property that now is, or hereafter may be, exempted from
levy and sale, under any Act of Assembly for such purpose, and with
release of all errors, &c. And it is further agreed and provided that
execution and alias, and pluries executions may issue at any time, and
from time to time, and as often any amount shall be due and owing
to said Western Pennsylvania Hospital, and that the books of
said Hospital shall be evidence, and a liquidation of the amount to be
collected on said executions.
Witness hand and seal the day of in
the year of our Lord One Thousand Eight Hundred and
Whereas, of, in the County
, and who is insane, has been admitted as a patient to
the Western Pennsylvania Hospital, at Dixmont, Pa.
Now, therefore the condition of the obligation is, That if the said
obligors shall pay to the said Western Pennsylvania Hospital, its
successors or assigns, the sum of Dollars and
Cents per week, for the Board of said patient, so long as shall

continue in said Hospital, with such extra charge as may be occasioned by ...... requiring more than ordinary care and attention, and shall provide for ...... suitable clothing; and shall pay for all such necessary articles of clothing as shall be procured for ..... by the said Hospital; and shall remove ...... from the said Hospital whenever required to do so by the Superintendent, and if the said obligors shall also pay, not exceeding Fifty Dollars for all damages the said patient may do to the furniture, or other property of the Hospital, in any one quarter, and for reasonable charges in case of ...... death; and in case the said patient shall be removed from said Hospital by, or at the request of us, or either of us, or by any other person or persons, before the expiration of three calendar months after ..... reception, then if the said obligors shall pay the board of said patient for thirteen weeks, and all other charges on the books of said Hospital, all payments for board and clothing to be made in advance, quarterly on the fifteenth day of March, June, September and December in each year, and at the time of removal, with interest on each bill from and after the time it becomes due—then this obligation to be void, otherwise to remain in full force and virtue.

Signed, sealed and delivered in presence of us.

# Report of the Executive Committee

OF THE MEDICAL AND SURGICAL DEPARTMENT OF THE WESTERN PENN-SYLVANIA HOSPITAL,

PITTSBURGH, October 1st, 1892.

JOHN A. HARPER, Esq. :

President Western Pennsylvania Hospital:

The reports of the Superintendent and the attending Staff, with their full and complete tables of statistics furnish a better and clearer statement of the good work done at the Twelfth Ward Hospital during the year 1892, than any words from your Executive Committee.

Two facts are worthy of remark, viz.: That so many persons needing medical or surgical treatment, and able to pay for such, have availed themselves of the skillful services of our Staff and the pleasant private rooms provided for the purpose—and that the Hospital is virtually a *Free Hospital*, devoted to the care of the suffering poor. While, as in duty bound, your Committee has endeavored to prevent the admission of those for whose relief and care provision was made elsewhere, yet our doors are opened so wide that no worthy case of suffering, from whatever quarter it may come, is rejected.

As to finances, it is pleasant to report that by the generous contributions of the citizens of Western Pennsylvania, we have been enabled to reduce our indebtedness about \$13,000, and at the same time continue our charitable work on the same scale as in former years. The difficulty involved in so doing will be apparent from a few figures.

 The cost of maintenance for 1892, was \$84,824.80. The difference between these amounts, represents the sum that must come from the earnings of the Hospital, the gifts of the benevolent, and the appropriations of the State, if the "West Penn" Hospital is still to be a source of blessing and health to thousands of sufferers.

One of the greatest difficulties your Committee has had to contend with for many years, has been the incompetency of many of those whom we were compelled to take as nurses. We have now the great satisfaction of reporting, that with the full approval of the General Board of Managers, we have opened in the Hospital, a Training School for Nurses. While the absolute necessity of this school has long been evident, the absence of any comfortable quarters for Women Nurses, made it impossible to establish a school; and the Hospital continued to be dependent upon such inexperienced nurses as could be secured. One of our kind friends, Mrs. J. H. Sawyer, whose intimate acquaintance with the internal arrangements of the Hospital convinced her that a Dormitory for Women Nurses was essential to success, placed the matter before Mrs. Henry Phipps, Jr., who immediately and most generously provided a large and completely furnished house, suitable for a Dormitory for a Superintendent of Nurses, and such pupil nurses as might be received.

With the advice and assistance of Miss Agnes S. Brennon, the Superintendent of the excellent Training School of Bellevue Hospital in New York City, we secured the services of one of its graduates, Miss Mary McMillan, who had served for some time as chief executive officer in one of the most important departments of Bellevue. In response to public announcement, many most excellent women applied for admission to the school. From this number, fifteen were selected. These entered at once upon the prescribed course of practical instruction in nursing, and as soon as they had demonstrated their capacity for the work, were placed in service in the wards of the Hospital.

Entering upon an experiment involving an entire change in the system of nursing, we are pleased to report that with only a few months' instruction and preparatory training, these pupil nurses have conclusively proved that women of good education and social position, moved by an earnest desire to benefit suffering humanity, and willing to undergo a severe course of training for two years, make much better nurses than those who have adopted the vocation merely as a means of earning a livelihood.

In establishing this School for Nurses, it has been the purpose of your Committee to fix the qualifications required of applicants so high and to make the examination and the month of probation so rigorous and strict, that only those who possessed a natural aptitude for nursing and were actuated by higher motives than pecuniary emolument, could stand the tests. We feel confident that the school will soon, not only provide the Hospital with a corps of excellent nurses, but be able to furnish trained experienced nurses for those in the community desiring such service.

Your Committee feels the more confident of final success in this matter, from the facts that the nursing in nearly all the largest and best Hospitals in Europe, has been placed exclusively in the charge of trained women nurses, and that the British Government, so eminently conservative of old methods and averse to new, has within a few years placed its Army and Navy Hospitals in care of women who had heen trained for their important duties in St. Thomas and Westminster Hospitals of London.

The members of the Staff have increased their already onerous duties by delivering to the Pupil Nurses full courses of practical lectures on the various phases of nursing.

All the Officials of the Hospital have been prompt and efficient in the discharge of duty.

On behalf of Executive Committee.

JOSEPH ALBREE,

Chairman.

### REPORT OF THE SUPERINTENDENT.

#### MEDICAL AND SURGICAL DEPARTMENT.

To the President and Board of Managers

Western Pennsylvania Hospital.

#### GENTLMEN:

The following facts and figures I place before you as my annual report for the year ending September 30th, 1892.

#### SUMMARY FOR YEAR 1891.

Patients in Hospital October 1st, 1891	176 $2,099$
Total under treatment.	2,275
Discharged	,
Died	
Remaining September 30th, 1892 171	2,275
Of the above patients there were:	_,
1,105 free with	
1,002 pay in full or part, 21,342 " "	
168 Soldiers	
Making a total	
Largest number at one time	240
Smallest " " "	171
Daily average	205
Average cost per day per capita\$	1 13
" " of food	32
Total expenditure for maintenance\$84,	
	•
RECEIPTS.	
To cash on hand October 1st, 1891	013 64
" State of Pennsylvania 45,	000 000
" Ground rent	000 000
" " Pay Patients	674 16
	302 06
•	596 00
,	<b>450</b> 00
" " Sale of Material	157 85
\$103,	193 71

#### EXPENDITURES.

By cash Maintenance, Salaries, &c  " " Extraordinary furnishing  " " repairs  " paid outstanding warrants  " Interest on loan	$5,620  ext{ } 10$ $2,025  ext{ } 57$ $39,241  ext{ } 47$
	\$134,715 94

The difference between receipts and expenditures show deficit of \$31,522 23.

In the past twenty-one years 25,199 persons have been cared for and of these, including soldiers, 15,816 were free, while 9,383 paid in full, or part.

The total cost was \$1,107,877.00; of this amount \$737,037.83 was raised by friends of the Hospital and citizens of Allegheny County, and \$370,839.17 by the State.

On September 1st of this year, the Training School was opened with Miss Mary MacMillan in charge, who has shown herself to be entirely competent for the office she fills.

Among the many friends of the Hospital, who have donated their Christmas offerings, I would mention the following: Miss E. M. Tindle, Miss Alice Tindle, the Misses Nelson, the King's Daughters, of Ingram and Mrs. Samuel McKee.

The members of the staff and corps of resident physicians have responded promptly to every call made upon them, at all hours of the day or night.

The employes of the Hospital deserve high commendation for the faithful and kind manner in which they have performed their various duties.

I also desire to return my sincere thanks to Mr. Hanson Rose, for the interest he has always taken in our Sunday service.

To the church choirs and ministers, who have conducted divine service each Sunday, we return our sincere thanks.

#### DONATIONS.

Among the many contributions received during the year, none were more acceptable than the following from the ladies of the different churches:

LADIES OF GRACE REFORMED CHURCH, WYLIE AVE., CITY-12 Sheets, 7 Spreads, 14 Towels.

Mrs. Alex. King, Negley Ave., City,—12 Feather Pillows, 1 barrel Apples, 1 Turkey, Books and Papers.

Sewing Guild of Allegheny.—Through Mrs. Jas. B. Scott—54 Sheets, 109 Pillow Cases, 183 Towels, 17 Bolster Cases, 6 Napkins, 34 Night Shirts, 4 Spreads, 6 Infant Dresses, 34 pairs Stockings, 22 Vests, 18 Ladies' Night Dresses, 18 Children's Night Dresses, 36 Ladies' Drawers and Skirts, 2 Blankets, 6 Hankerchiefs, 7 Aprons.

Guild Society, Allegheny City,—6 Sheets, 9 Under Shirts, 11 Roller Towels, 33 Hand Towels, 12 Bolster Cases, 17 Night Dresses, 7 Pillow Cases, 6 Night Shirts.

## Report of Staff.

To the Board of Managers of the

Western Pennsylvania Hospital.

GENTLEMEN:

The work of the year just closed, has been exceptionally active and important. The rapid growth of population in the region supplying material for this Hospital, and the increasing business organizations, such as railroads and manufactories, have naturally produced additional demands for Hospital accommodations.

Our Institution has been equal to the demand however, and we can claim with pride that no proper subject for treatment, who urgently required it, has been refused admission.

The apparently high rate of mortality is readily accounted for by the fact that many of the cases, both surgical and medical, are reduced to a desperate condition before admission, quite a considerable number having been the victims of fatal injuries and perished before any medical measures could be adopted.

Several cases have been under treatment during the past year which seem to illustrate a weak point in the legal aspect of our relation to patients. Many of those who apply for and receive treatment are ignorant and prejudiced. They are entirely incapable of forming any intelligent opinion as to the treatment they require, yet as we understand the law, their obstinate and ignorant opinion may frustrate the decision of the whole staff of this Hospital, and with the well founded conviction that prompt and active treatment should be instituted, we are forced idly to witness the disastrous results, which we believe should and could be obviated. To illustrate we cite the following case:

Maria King, washwoman, widow, white, thirty-seven years old, was admitted to the Western Pennsylvania Hospital, July 3rd, 1891. Symptoms of strangulated hernia being present, a consultation of such members of the staff as were available was held at once, operation decided upon and an hour fixed, meeting for operation was held according to appointment, when the patient announced that regardless of all influences, she declined to submit to operation under the

circumstances. The combined opinion of the Board of Managers and Staff, as far as they could be consulted, and the Superintendent, was that an operation against the positively expressed wish of patient was not justifiable. The woman died, and an autopsy revealed an Omental hernia which had excited general peritonitis, furnishing very positive proof that a good result would have followed the prompt adoption of proper treatment.

We respectfully request that all possible influence may be used to procure such legislation that the appropriate treatment in such cases may be adopted without subjecting the Hospital and its officers to liability for damages.

We are pleased to commend the successful establishment of a training school for nurses in connection with our Hospital.

There is no better field anywhere for the education of nurses, and the prompt formation of a fine class is ample proof that there is no lack of material. Doubtless this enterprise will prove very advantageous, both to the Hospital and the community at large.

We desire to express the highest appreciation of courtesies received from the Board and satisfaction with services rendered by the Officers, Resident Physicians and other Employes of the Institution.

Respectfully submitted,

C. D. KING, W. SNIVELY,
F. LEMOYNE, W. H. DALY,
JAMES McCANN, C. EMMERLING,
J. B. MURDOCK, J. C. LANG.

### RULES FOR THE ADMISSION OF PATIENTS.

TO THE

### MEDICAL AND SURGICAL DEPARTMENTS.

Applications for admission of patients may be made daily at the Hospital, to any member of the Executive Committee, or of the Medical Staff.

The patient, if able, should in all cases apply in person; if unable to attend, the application may be made by a friend, and if necessary, the patient will be visited by the attending physician or surgeon, who shall ascertain whether the applicant be a fit subject for admission.

Admission for free patients can only be obtained when beds are vacant, and by a certificate of the visiting Physician or Surgeon, countersigned by a member of the Executive Committee, and addressed to the Superintendent Applicants shall engage to comply with the rules and regulations governing free patients. No persons shall be admitted to free beds except cases of acute disease, or recent accidents, but no cases of infectious or contagious disease, or syphilis, can be received, nor patients who have been inmates of other hospitals within three months before their application, unless by the consent of the House and Supply Committee; nor can any patient be retained longer than two months without a special vote of the Executive Committee. No infectious or contagious diseases can be admitted under the provisions of the Charter.

All persons suffering from recent accident or injury, shall be received into the Hospital without the usual forms of application.

Applications for the admission of pay patients shall be made to the Superintendent, who, in conjunction with the House and Supply Committee, shall take such securities as may be required.

The price of board and medical attendance shall be such as the House and Supply Committee may determine.

The following cases are considered ineligible to the Institution :

Those who, upon due examination, are considered incapable of relief.

Those who have complaints for the care of which other establishments have been provided.

Those who, wanting food and not medicine, are more properly objects of relief from Directors of Poor and public charity.

Patients becoming convalescent are to be discharged by the attending Physician or Surgeon as soon as possible, that their places may be filled by some other afflicted persons.

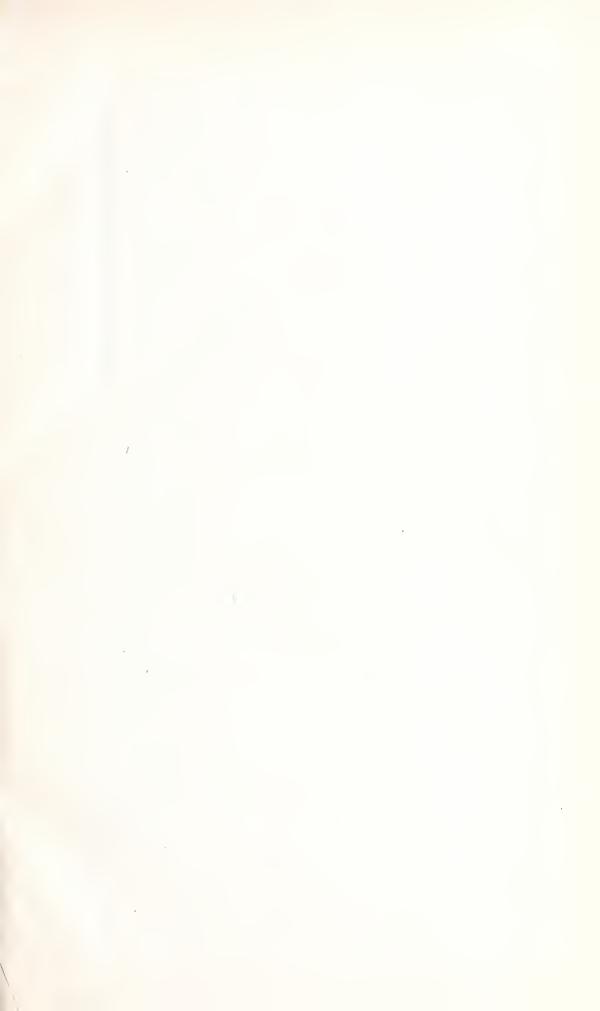

Patients giving a wrong representation of themselves, their circumstances, their disorders, or otherwise, to gain admission, and who, after being admitted, are found to have any disorder not considered proper, are to be discharged.

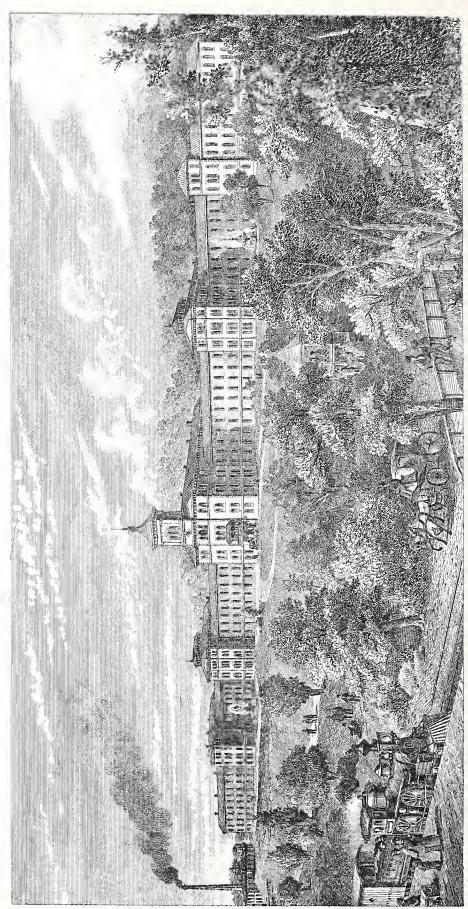

No charity patient is to be continued longer than two months, except upon the recommendation of the Medical Officers that a more lengthened period will essentially conduce to the patient's health; exceptions to this rule are those cases of lingering disease, where death is inevitable.

Union soldiers of the volunteer armies of Western Pennsylvania will be admitted to the Medical and Surgical Department of the West Penna. Hospital upon the recommendation of any Post Commander of the Grand Army of the Republic, or Colonel Commander of the Union Veteran Legion in Western Pennsylvania, provided that such applicant shall come within the regulations of the Hospital and shall be found to require medical or surgical treatment or care, upon examination by any of our Medical or Surgical Staff.

# ANNUAL REPORT

OF THE

## MANAGERS

OF THE

# Western Pennsylvania Hospital.

To the Honorable President and

Members of the Board of Public Charities:

Gentlemen:—I have the honor to lay before you the report of the operations of the Western Pennsylvania Hospital for the year ended September 30th, 1893, referring to the accompanying reports of the Superintendents, the Treasurer, and others, for details and statistics. I do this with pleasure, for the Institution, in all its departments has fully sustained its established reputation, and nobly done its work of extending aid and comfort to the suffering.

## THE DEPARTMENT FOR THE INSANE AT DIXMONT.

There were 740 patients in the Hospital at the beginning of the year; 256 were received during the year, 304 were discharged, and the number remaining on October 1st, 1893, was 692. This reduction is ascribed to the fact, that in order to relieve its crowded wards your Board directed 20 male patients to be sent to the new hospital for chronic insane at Wernersville, and 77 incurable, harmless patients to be returned to the various alms-houses.

The good effect of this thinning out was immediately felt, as the Superintendent in his last quarterly report to the Board stated that "the health of the patients was remarkably good; very few were sick enough to be confined to their beds, and no cases of fever or acute diseases existed in the hospital."

By the Treasurer's Report, duly audited by the Finance Committee, you will perceive that the receipt		
of the department for the year were,	\$141,701	01
The balance at the beginning of the year was -	26,219	18
	\$167,920	19 —
r	\$161,419 6,501	
The balance at the end of the year was		
	\$167,920	19

Last May, Dr. George G. Graham, after serving the Institution efficiently for ten years as Assistant Physician, tendered his resignation, which was accepted by the Executive Committee with regret; and thereupon it was unanimously resolved to fill the vacancy upon the Staff by the appointment of a woman physician, to be placed in charge of the female patients, subordinate of course to the Superintendent.

In due time, after considering the qualifications of several candidates for the office, Dr. Elizabeth C. Mallison, a graduate of the Womans' Medical College of Pennsylvania, in Philadelphia, was chosen. She had had experience in private practice, and had been for several years Assistant Physician at the First Minnesota Hospital for the Insane, at St. Peter, Minn. Dr. Mallison has, since she has been in office, performed her duties very acceptably to the Executive Committee, the Superintendent, and all with whom she has been associated.

The Executive Committee inaugurated another reform in the appointment of a Purchasing Agent. His office is at the hospital, and his business is to visit the markets daily, keep thoroughly posted as to prices, and opportunities to buy commodities needful, and to fill the requisitions of the Superintendent by the purchase of the best articles obtainable, at the lowest prices. His services have already proved to be to the financial advantage of the department, and the Superintendent is greatly relieved and enabled to devote his whole time to his professional duties.

THE CHAPEL AND EXHIBITION HALL which had become dingy and dilapidated from long use, was cleansed and redecorated. It now presents a very cheerful and attractive appearance.

The much needed and often referred to New Barn has been built. The Institution is under obligations to Messrs. Rumsey & Townsend, of the Executive Committee, for the effectual manner in which this was accomplished. It is a first class barn, "quite up to date," embodying in its design and construction every improvement and convenience. The building is frame, 92 x 62 feet, of two stories; and the roof is covered with slate. The dairy is located on the ground floor, and has capacity for about fifty cows, and box stalls for breeding cattle. It is well lighted and ventilated, supplied with abundance of running water, and the floors made of Portland cement, are thoroughly drained. Particular attention was directed towards supplying means for keeping the premises clean and free from offensive odors. On the same floor is a fire-proof room for a steam boiler and engine used for cutting and grinding fodder and grain; adjoining is a room in which the feed is mixed and prepared, and from it readily distributed into the feeding troughs. There is also on the same floor, but isolated from the rest, a milk receiving and cooling room. In the second story are horse stalls, the floors of which are double, sealed and made water proof, an apartment for carriages, wagons and farming implements, store rooms for produce and grain, and over all, space for a generous supply of hay, straw and fodder.

In July, the old brick building known as the "GILLELAND HOUSE," and which was fitted up for an emergency hospital in the event of a visitation of Cholera or for contagious diseases, was practically destroyed by fire. The walls have been taken down, as the building was not located where the management was justified in expending more money for its reconstruction. It was insured, and the amount of the loss adjusted and paid to the Treasurer.

Hardwood floors have been laid on several of the corridors, new furniture placed in wards, automatic fire extinguishers distributed throughout the buildings, and the whole premises have been industriously looked after and kept in order and repair.

THE FARM yielded as abundant crops of fruits and vegetables as the land was capable of producing. The pleasure grounds, conservatories, flower beds, shrubbery, roads and walks were kept in excellent condition, chiefly by the voluntary labor of the patients and their attendants. I have only words of praise with which to acknowledge the operations of this department during the past year, under Dr. Hutchinson, his assistants, and the other employes, and on behalf of the Board I thank them.

Nor can I conclude this portion of my report without referring in particular to the gentlemen of the Executive Committee, who at great personal inconvenience have continued to visit the hospital weekly, inspect its every part, look after the comfort and condition of the patients, and transact its business affairs with skill and accuracy. Every bill has been scrutinized, every account audited, warrants ordered, read and compared, and in every instance signed by three of the Committee. All meetings have been held at Dixmont. Harmony and good feeling have prevailed, and every important measure was fully and freely considered, and when settled upon, unanimously adopted.

I feel under very great obligations to these gentlemen who have done so much for the Institution, and co-operated with me in my endeavors to serve it at the pleasure of the Board of Managers.

## THE MEDICAL AND SURGICAL DEPARTMENT.

The records of this department show that during the past year 2,281 patients were received and treated. All these were serious cases requiring an actual residence in the hospital, but many of a less serious nature sought and found relief at the hands of our physicians and surgeons, of which no records were made, as the hospital does not maintain an out of-door department or a dispensary.

The average daily number of patients in the hospital throughout the year was 189, and the whole number of days of hospital occupancy was 69,242.

The Treasurer's Report, (also herewith,) shows that the receipts from all sources, including the balance on hand at the beginning of the year were - - \$102,373 69

And the expenditures for maintenance, salaries and wages, repairs, interest, &c., &c., were - - - 99,268 58

Leaving a balance of - - - - \$3,105 11 in his hands when his books were closed, to meet outstanding accounts

to a much larger amount.

The expenses for conducting the department have exceeded its revenues, and the indebtedness which I had hoped would have been reduced, has, on the contrary, been increased.

The Department owes:

To the Pennsylvania Railroad Company, - - \$ 50,000 00

To the Bank of Pittsburgh, - - - - 8,000 00

Accounts for which warrants have been drawn upon the Treasurer, but have been withheld for lack of funds to pay them, - - - - - - 43,043 19

\$101,043 19

I am compelled to report this most discouraging state of financial embarrassment, as it appears to me it would be improper to suppress the facts.

The very life and future usefulness of this department of the Institution is threatened by the arrearages that have accumulated, notwithstanding the effort of the Executive Committee to "maintain it within its visible means of support."

The Legislature at its last session appropriated the usual sum of \$90,000 to aid in the maintenance of the department for the succeeding two years, but it refused to grant the money asked for to pay off the debt to the Pennsylvania Railroad Company, and the money needed to build and equip a new laundry, kitchen and boiler house, both of which petitions were approved by your Board. The railroad debt, as you are aware, was incurred through failure of the Legislature to appropriate means for maintaining the hospital previous to and during the years 1883 and 1884, and bears interest at the rate of \$3,000 per annum. The improvements contemplated, but now indefinitely postponed, if they had been carried out, would have facilitated the household work, and reduced the running expenses.

The hospital building is a very old one. It has been repeatedly changed, renovated and extended, yet it is practically without modern conveniences, and therefore the administration of its household affairs cannot be conducted with ease or economy. A very large corps of employes and attendants are required to look after it, and to serve and attend the patients. Repairs are incessant, sometimes extensive, and always necessary to preserve the property and keep it in presentable appearance. In no case, I think, have the comfort and welfare of the patients been neglected. They have had the treatment of most

efficient physicians and surgeons, been ministered to by kind nurses, their food has been of the best quality, plenty and skillfully prepared. The standard of excellence that has distinguished the hospital in the past, has not been lowered in any particular.

The Training School for nurses has now been in operation for more than a year. About 34 applicants have passed the preliminary examinations, and have enrolled their names and are under course of instruction. They are all engaged in practical nursing, and furnish most of the service required by the patients. The school may now be considered in successful operation.

Since the opening of Brereton Avenue through the grounds the property has remained in a very chaotic state. Their improvement and adornment have been undertaken by Mrs. Robert Pitcairn, and under her supervision much progress has been made towards that end. The unsightly ravine, in front of the building, has been filled up, and the steep hillsides graded, and new driveways and walks have been laid out. The incompleted work will be taken up in the coming spring and finished. This work necessitated the removal of the old stable and sheds, and obliged the Committee to erect a good but inexpensive building in their stead at another place.

A new brick house designated "The Morgue," has been built. Money was especially contributed for this purpose by friends.

To the Superintendent, Mr. William A. Cowan, much eredit is due, for his interest and industry in conducting the department, and I am glad to extend to him the acknowledgement of the Board of Managers, with my own, for his faithfulness; and also to Miss McMillan, the Principal of the Training School for Nurses, who is an enthusiast in her vocation, and has displayed great ability in establishing the school.

Especially are our thanks to be accorded to the Medical and Surgical Staff.

In the death of Dr. James McCann—long of the Medical and Surgical Staff—which occurred on June 13th, the Institution sustained an irreparable loss. For twenty years his labors to promote the best interests of the hospital have been unceasing, and his professional work among thousands of its patients was untiring. He was a good

and worthy citizen, a shining light in his profession, a kind, sympathizing friend, ever ready to help the poor and needy with an open purse or by medical service. His skill as a surgeon did much to establish the reputation of the hospital in the estimation of the profession which he honored, and in this community where he lived a noble life.

THE ENDOWMENT FUNDS have not been increased or changed during the past year.

They consist of:

Funds belonging to the Department at Dixmont,	\$ 23,000	00
And funds belonging to the Medical and Surgical		
Department,	305,816	67
	\$328,816	67

## THE TRUST FUNDS.

The earnings of the Brewer and Crawford Funds, of which the hospital is the almoner, purchased 71,675 bushels of coal, and it was judiciously distributed by the Committee in charge among the worthy poor of the city and vicinity, during the long and bitter winter of 1892–93, and this great charity was a blessing to hundreds of destitute families.

All of which is respectfully submitted.

JOHN A. HARPER,

President.

# Report of the Executive Committee

OF THE

# Department for the Insane at Dixmont.

To John A. Harper, Esq.,

President of the Western Pennsylvania Hospital.

DEAR SIR:—Your report of the Board of Managers to the Board of Public Charities, together with the report of the Superintendent, comprise most of the items and facts which would be of interest to the contributors and managers, leaving but little to add by the Executive Committee. They would especially call the attention of the contributors to the new barn and the improvements surrounding it erected and improved since the last annual meeting, and request their inspection of the same.

The usual amount of care has been given to the grounds within the enclosure, and a very great improvement on the State road along the front line of the property.

A considerable annual expenditure is required to keep the extensive buildings in repair; this has been promptly attended to, and can now report all in good repair. It is unnecessary to specify the items of expenditure; they will be found in detail in the Treasurer's report.

Some of the members of the Committee have visited the Hospital weekly, and at their monthly meetings have examined all the bills of the previous month, and drawn warrants for the payment of the same. The Institution is free from debt.

The Superintendent's report as to the internal affairs of the Institution requires nothing further to be reported by the Committee, except to say that everything is entirely satisfactory.

Respectfully submitted by the

EXECUTIVE COMMITTEE.

January 2, 1894.

# REPORT

OF THE

Physician and Superintendent

OF THE

Department for the Insane at Dixmont.

## REPORT

OF THE

# Physician and Superintendent

OF THE

# HOSPITAL FOR THE INSANE AT DIXMONT.

To the President and Board of Managers:—

Gentlemen:—The thirty-seventh annual report of this Department of the Western Pennsylvania Hospital, and my tenth annual report, I have the honor, in conformity with your rules and regulations, to present you for the year ending September 30th, 1893.

From the date of the reception April 7th, 1856, of the first patient into the Hospital, the large number of seven thousand and twenty-six insane have been received within its doors, of whom nineteen hundred and ninety-four were discharged as restored, eighteen hundred and sixty as improved, seven hundred and ninety-four as unimproved, and sixteen hundred and eighty-six died, leaving therefore six hundred and ninety-two patients in our care at the close of the year.

These patients are the natural inheritance of all institutions of this character, and as Dixmont is now very rightfully regarded as one of the oldest Hospitals for the Insane in this country, the members of its household are many of them aged and feeble persons, who have spent the greater portion of their lives within its walls, and to whom it is their home. Chronic forms of insanity make up the statistical tables, as to their mental condition, while the younger and recent cases present the only hope of recovery in the future, and the earnest wish that this is a Hospital for the cure of the insane rather than an asylum. Is it any wonder the visitor in passing through our corridors is impressed with the idea of there being so many people whose locks are white and silvery with age? Is it any wonder, under all these

circumstances, and with our continued crowded condition, the number of recoveries falls far short in proportion to what science, medical skill and philanthrophy has done for the insaue in recent years?

Again, very many of these patients, as well as those received more-recently, are not in a strict sense proper or suitable cases for institution care such as this; many of them, in my opinion, could be very comfortably maintained at home, particularly those whose forms of mental deterioration are undoubtedly due to advanced age. It is a well established fact, such patients removed from their home life and placed in the care of strangers, there to begin to them in their declining years a new existence, where discipline and daily hospital routine everywhere surrounds them, soon loose all hope, and rapidly succumb to the wasting disease of which they are victims.

Again too, many of our patients are those whom from faulty heredity and incidents due to early childhood, present cases of recognized forms of arrested development and weak intellects. These patients should, in my opinion also, find a refuge and home in an industrial school especially designed for their care, where they could receive that practical training so conducive to their happiness, as well as of use and benefit to them and to the State. To commit all such patients to an institution devoted to this object has been in the past quite impossible, for various reasons, though it is to be hoped the additional provisions now being made in Pennsylvania for this department of charity will relieve this Hospital from the necessity of admitting patients of this character in the future.

On the other hand, however, it may be said, and very justly so, in every instance these patients have been legally committed to the Hospital, and upon no argument could they be denied admission. In admitting this fact, and in the receiving of these patients, the Hospital has been afforded opportunities to open its doors and extend a cordial welcome to those whose lives were blighted by disease, and for whom the earthly ties of love and affection have long ceased to bind them in ministering to and caring for them at home. Such instances as these should delight the heart of its every officer, and win the admiration of every true friend of the afflicted, the sick, and the aged, whose only comfort lies in the provisions made for them in the establishment of a hospital prompted by the generous and humane instincts of a Christian people.

At this time it may be of interest to your Board to make some report of the one hundred and thirteen patients transferred from the Hospital in Pittsburgh to the Department for the Insane at the time of formally opening this Institution, November 11th, 1861, and I may say, from an examination of the records, I find but five of this number remain, of whom there are three men and two women. The presence of these old patients calls to mind the early history of the Institution, and it is gratifying to know they are so happily eared for, and time has dealt so kindly with them. All of them enjoy excellent health, and are busily engaged each day in some occupation about the premises.

The total number of patients under treatment during the year was nine hundred and ninety-six, of whom eighty-eight were discharged as restored, the large number of one hundred and nine were discharged as improved, eight as unimproved, and ninety-nine died. The average number throughout the year was seven hundred and forty-three, while the highest number attained upon any one day was seven hundred and seventy-four, and the least number under our roof was six hundred and eighty-three.

Eight patients were received who were under twenty years of age, sixty-six were under thirty years, while one hundred and twenty-four patients were admitted between the ages of forty and fifty years. Of this number seventy-seven were males. The increased number of admissions at this time of life only confirms the well established rule that insanity is most frequently met with when the intellect as well as the physical resources have attained their fullest development, and the responsibilities of life are presumably the greatest.

Between the ages of fifty and sixty, thirty-nine persons were admitted, from sixty to seventy, twelve, and seven female patients were admitted who were over seventy years of age. One hundred and forty-eight patients were natives of Pennsylvania, seven were from other States, forty-four were foreigners, and the nativity of fifty-seven was unknown.

Thirty-six patients were received upon the formal request of their friends, one hundred and thirty-nine were sent to the Hospital by the various poor authorities, and eighty-one commitments were issued by the several courts.

The varied forms of mania were represented in one hundred and thirty-seven instances, while one hundred and two patients were melancholiacs, five dements, seven were suffering from paresis, and five were regarded as cases of imbecility.

In formulating the history of those received, it was further ascertained very many of them presented undoubted evidence of long continued mental disturbance, and which of itself, it may very safely be stated, warrants the belief that a complete and ultimate recovery is quite impossible. Others were suffering from structural brain disease, for whom no hope could be vouchsafed to their friends. These patients, in addition to their mental disorders, almost without exception presented other complications in the enfeeblement of their bodily health, which was apparent to a greater or less degree. It is the exception to find an insane person in perfect physical condition. the treatment of these patients, that care and remedial measures were adopted suited to their individual necessities, and much was accomplished in their improved state of mental and physical health. Some were so far restored as to enable them to return to their homes. Those remaining however, only swell the number already referred to as comprising our population.

Fifty-nine of those admitted were regarded therefore as chronic cases of insanity, though not all incurable, while nineteen were suicidal, and thirty-five presented homicidal impulses; sixteen were brought to the Hospital handcuffed, and nine were exceedingly dirty and repulsive, presenting every appearance of neglect upon the part of their friends and those having them in their care.

Of the total number discharged during the year, twenty male patients, upon order of the Board of Public Charities, and in compliance with the statute providing for the erection of the Asylum for Chronic Insane, were sent to that Institution at Wernersville, Pa., in July. These patients were of the quiet, tidy, incurable class, all in good bodily health, and capable of assisting very largely in the work of getting the new building and grounds ready for occupancy the coming fall. It affords me pleasure, to state in a letter from the Chairman of the Commission having this work in charge, the selection of these patients was most satisfactory, and met their entire approval. With the view for the relief of our crowded wards, fifty-nine patients were also discharged from the Hospital by order of the Board of Public Charities, and returned to their respective County Homes, where facilities for the care of a few insane had been arranged. These pa-

tients were also quiet and harmless, and required but little medical attention. I regret to say, however, many of them have since been recommitted into our custody.

The number of deaths is very considerably less than for the previous year, owing, I believe in a measure, to the relief obtained in the dismissal of so large a number of our chronic cases, and the consequent improved condition of health of those remaining. As generally observed in hospitals of this character, Consumption was the predominant cause as shown in twenty-six cases. The exhaustion from the several forms of mania, melancholia and paresis follows in producing forty deaths, while the various physical disorders as recorded in the mortuary tables accounts for the remainder.

No deaths, I am happy to say, were the result of any accident or injury, and we were spared the presence of any acute or infectious disease in our midst. Typhoid fever spoken of in previous reports, and which at one time assumed such scrious proportions, has entirely disappeared.

Repeated criticisms, as well as suggestions, have been made in the annual reports of this Hospital in reference to the improper method in which female patients were brought to our care, oft-times in charge of men attendants. I am very glad of this opportunity to report the passage of an Act, approved the fourteenth day of April, 1893, requiring all female insane in transit to hospitals, to be provided with the care and assistance of same female friend. This is a most excellent and humane law, and it is only surprising was not enacted and made obligatory long ago, upon all having the authority and charge of the indigent insane.

Eighteen of the patients received during the year were transferred directly from the jails of this district, where many of them had been confined for weeks, and in some instances months, awaiting a court trial, or the necessary order committing them to the Hospital. While it is well known it is often inexpedient to immediately order them to an asylum, the decision should be as speedily determined as possible, as the delay, now so frequent, for various reasons may render the patient an incurable one before entering the hospital. Such is the belief, as well as the experience, of every physician caring for the insane. Too much importance cannot be attached to the value of wise and systematic treatment in the early stage of the disease. It is for this

reason at least many who now only partially recover or improve in a hospital, would have recovered had they been committed to its care upon the first appearance of their illness.

The operation of trephining was performed upon a male patient with the hope of relieving his mania, the eause of which was a gunshot wound over the left orbit, received at the battle of Bull Run; at this time, though several months have elapsed, no appreciable improvement in his mental condition is observed, and it is feared therefore this measure was delayed too long.

In the treatment of the patients, the usual eare in the selection of proper remedies, both medical and in a moral sense, was maintained for their restoration and the amelioration of their malady; nothing was left undone, and the recovery of so large a number is most gratifying. To this end also, aside from the employment of drugs, renewed efforts were put forth in the conduct of our varied amusements and occupation.

Throughout the pleasant weather all were encouraged to go out in the open air, and engage in walking and out-door games and sports, such as tennis, and eroquet, while the men preferred base ball, foot ball and quoits.

Many of the aged and infirm were afforded pleasure in driving and in viewing the beautiful seenery everywhere present along our country roads. Some formed lunch parties, and spent the day in the woods. In the house the evenings were passed pleasantly in eard parties, daneing, music, magic lantern pictures, parlor games, and in attending the many concerts and plays given for them by young people from the city. The holidays were appropriately observed, and the wards were liberally furnished with reading material. On Sunday, religious services were regularly held in the Chapel.

Many of the female patients were oeeupied in the kitchen and laundry departments and in ward duties, while others busied themselves in sewing and fancy work. In the summer months a large force of male patients were induced to take part in the work of the farm and in the repairs and improvements. In the work thus performed, only those in the opinion of the physician, who could be benefited by open air exercise took part, and all were placed in the immediate charge of capable nurses, whose duty it was to watch over and care for them. As a result of this systematized labor, we were

enabled to complete the rebuilding of the Beaver road along the front of our property; also, do all the grading and excavation for the new barn.

The lectures delivered by the medical staff to our attendants have been continued. These lectures embrace instruction in the art of nursing in its every detail, and the good thus accomplished is everywhere witnessed in the high standard of nursing now attained by many of our older nurses, and in the comfort and happiness everywhere shown by the patients.

All physicians appreciate the value of skilled attendance upon the sick, but in no class of patients is this better understood than in the treatment of acute insanity and nervous disorders. I hope the day is not far distant when only graduates of recognized schools for trained nurses will be able to secure employment in such capacity in Institutions for the Insane.

To enumerate in my report the several repairs and improvements, as well as the progress in the building of the new barn, I deem quite unnecessary, as they are most carefully set forth in the President's and Executive Committee's reports, and to which I refer you.

The farm continues to yield an abundance of excellent vegetables, and never looked so well as the past year. The detailed statement of this department at once shows the liberal provision made in furnishing the dining tables for our household.

Doctor George G. Graham, so many years the senior assistant physician upon the medical staff, resigned in May, to engage in private practice, and Doctor W. Brown Ewing was promoted to the position of first assistant.

On June 27th, by the unanimous approval of your Board, Doctor Elizabeth Carr Mallison was chosen, and entered at once upon her duties as assistant physician in the female department. Dr. Mallison graduated at the Woman's Medical College of Pennsylvania, and for several years was assistant in the First Minnesota State Hospital for the Insane, at St. Peter. She came to us therefore with experience and training, and with her many social qualifications, is well prepared to assume the responsibilities of her office, which she has done most acceptably.

I would especially direct your attention to the able and faithful service rendered the Hospital by my older associates upon the medical staff, Dr. W. Brown Ewing and Dr. J. Moorhead Murdoch. These gentlemen have been unceasing in their endeavor to promote the welfare and happiness of our patients. To them I owe my personal and grateful acknowledgments.

To Miss Hope and Mr. Morrow, so many years the Supervisors, I extend my heartfelt thanks for their continued and ever watchful care over the patients entrusted to their immediate supervision, and the zealous performance of all other duties assigned them.

Mr. Allen, the book-keeper and his assistants, Miss Black, the house-keeper, Mr. Kunkle, assistant engineer, Miss McCrum, the laundress, and Mr. Mann, the steward, for their efficiency and help to me in their respective departments, I also thank.

Our farmer, Mr. William Knoderer, who for more than thirty years has been intimately associated in the growth and prosperity of the Hospital, still continues to perform the duties of his position with his accustomed vigor and dispatch, and Mr. George M. Gray, so many years our engineer, maintains his efficient and solicitous care over all the affairs in his charge. It gives me pleasure also to thank these gentlemen for their aid to me in the competent manner displayed in conducting their respective departments.

Much of the success attendant upon the management of a hospital depends upon its nurses, and I thank all who were faithful in the discharge of the sacred trust reposed in them.

In concluding this report I tender to the President and members of your Board, and the Executive Committee, this expression of my sense of obligation under which you have placed me for your continued kind assistance and counsel in the fulfillment of the responsibilities committed to my care.

With a grateful recognition of an over ruling Providence in the affairs of the Institution the coming year, this report is respectfully submitted.

HENRY A. HUTCHINSON.

ALLEGHENY,	FAYETTE,	JEFFERSON,	WASHINGTON,
BEAVER,	GREENE,	LAWRENCE,	WESTMORELAND.
BUTLER.			

#### Admission of Patients to Insane Department.

- 1. Preparatory to the admission of a patient, unless when committed by order of a court, the Superintendent shall be furnished with the certificate of two physicians, who have been in practice for five years or more, that they have separately seen and examined the individual within two weeks of the date of admission, and believe him or her to be insane, and these certificates shall be sworn to before some alderman or judicial officer, with the order of near relative or friend that the patient may be received into the Hospital, with a statement as required by law, and a bond with satisfactory security, for the payment of board and other expenses while in the institution. All private patients thus received shall make a payment of thirteen weeks' board in advance, when brought to the Hospital, no part of which shall be refunded; and if taken away uncured, and against the advice and consent of the physician, in any succeeding quarter, no part of the payment shall be refunded.
- 2. Whenever a patient is sent to the Hospital by order of the Court, the order or warrant, or a copy thereof, or, if sent by the Directors of Poor, an order sent by the Directors or their agent accompanied by the Certificate of Insanity, as required by law, shall be lodged with the Superintendent of the Hospital.
- 3. Each patient, before admission, shall be made perfectly clean, and be free from vermin, or any contagious or infectious disease.
- 4. Each male patient shall be provided with at least three new shirts, a new and substantial coat, vest and pantaloons, three pairs socks, two pairs drawers, two undershirts, a hat or cap, cravat, collars, handkerchiefs, shoes, and one pair of slippers.
- 5. Each female patient shall have three calico dresses, four chemise, three pairs drawers, three pairs hose, three nightgowns, two flannel skirts, one Balmoral skirt, two muslin skirts, six handkerchiefs, four collars, two pairs shoes, one shawl or cloak, and one hat or hood.
- 6. It is very desirable that extra and better apparel should be sent with those accustomed to it, that when their health is improved, or when they attend religious worship, walk or ride out, their self-respect may be preserved.

In all cases the patient's best clothing should be sent; it will be carefully preserved and only used when deemed necessary for the purpose above mentioned. Jewelry, and all superfluons articles of dress, knives, &c., should be left at home, as they are liable to be lost, and for which the officers of the Hospital are not responsible.

All clothing, if not taken away at the time of patient's removal, or within three months afterward, will be disposed of as the officers of the Hospital may think best, and no compensation whatever will be made therefor.

- 7. A written history of the case should be sent with the patient, and, if possible, some one acquainted with the individual should accompany him or ber to the Hospital, and from whom minute, but often essential particulars may be learned.
- 8. The price of board, including washing, mending, and attendance for all who are supported at the public charge, is four dollars per week. For private patients, or those supported by themselves, or their friends, the price varies from five to ten dollars, according to the trouble and expense incurred, and according to their ability to pay. Higher prices are paid by special agreement with the physician, for extra attention and accommodation.

Payments are to be made quarterly, in advance.

9. A bond, with satisfactory sureties, will be required for the payment of the board and expenses, and for the removal of the patient when discharged, of all persons, excepting those sent at the expense of the counties or townships.

Those who bring friends should be prepared to give a bond, and, if strangers furnish evidence of their responsibility.

- 10. All bills remaining unpaid one month after date of presentation, are placed in the hands of the Solicitor of the Hospital for collection.
- 11. As the diet of the patients is under the absolute control of the Superintendent, no nuts, candies, cakes or other edibles shall be given to the patients, by their friends or visitors, without his express permission.
- 12. Visitors are admitted to inspect the Institution on any day (except Sunday,) between the hours of 10 A. M. and 12 M., and between 2 and 4 P. M.; but no visitor shall be admitted to the wards occupied by patients, without express permission from the Superintendent; and especial care is to be taken that no amount of visiting is permitted that shall prove injurious to the patient. No visitors shall be admitted on holidays.

Visitors will please not intrude on the grounds used by the patients, or give to or receive anything from patients.

- 13. The Hospital is located eight miles west of Pittsburgh, on the Pittsburgh, Fort Wayne & Chicago Railway, at Dixmont, and can easily be reached by cars, there being ten trains (east and west,) each day; (except Sunday,) stopping at the Hospital Station.
- 14. Applications for the admission of patients, and all communications in regard to the condition, health, bills, &c., of those who are in the Hospital, shall be made to the Superintendent.
- 15. As Dixmont Station has now an Adams Express Office, all goods may be sent to the Hospital direct by express or freight, as may be preferred.

The friends of patients can communicate with the Institution by telegraph and telephone.

# Forms of Commitment.

The following forms have been prepared by the Committee on Lunacy, to be used in all cases (except those sent by order of Court) for the commitment of Insane patients by their friends or by Directors and Overseers of the Poor, to the Hospital for the Insane at Dixmont, Pa. No such patients will be received unless the Forms as given are fully complied with.

Residence....

#### LUNACY LAW OF 1883.

Degree of relationship (if any) or other circumstances of connection

Note.—The certificate must be signed by at least two physicians, and made within one week of the examination of the patient, and within two weeks of the time of the admission of the patient and shall be duly sworn to or affirmed before a judge or magistrate of the Commouwealth of Pennsylvania, and of the county where such person has been examined, and who shall certify to the genuineness of the signatures, and to the standing and good repute of the signers.

And any person falsely certifying as aforesaid, shall be guilty of a misdemeanor, and also

be liable civilly to the party aggrieved.

with the patient.

When patients are sent by order of Directors or Overseers of the Poor, they shall, in addition to the foregoing papers, fill up the following Order of Admission as required by the rules of the Hospital:

# W. P. HOSPITAL FOR INSANE, AT DIXMONT, PA.

Will please admit the within namedas a patient
to the Hospital, and charge the
of thePennsylvania, and we hereby covenant and agree
for ourselves and our successors in office, that we will well and truly
pay or cause to be paid, to the said Hospital all the expense of the care
and maintenance, and of the removal to and from said Hospital of said
patient, quarterly, from this date, and in the event ofdeath,
while in said Hospital, we and our successors in office agree to pay the
funeral expense of said patient.
***************************************

# Bond for Private Patients.

Know all Men by these Presents, That we,
collected on said executions.  Witnesshand and sealtheday ofin the year of our Lord One Thousand Eight Hundred and, in the County, and who is insane, has been admitted as a patient to the Western Pennsylvania Hospital, at Dixmont, Pa.  Now, therefore the condition of the obligation is, That if the said obligors shall pay to the said Western Pennsylvania Hospital, its successors or assigns, the sum of

continue in said Hospital, with such extra charge as may be occasioned
byrequiring more than ordinary care and attention, and
shall provide forsuitable clothing; and shall pay for all such
necessary articles of clothing as shall be procured forby the
said Hospital; and shall removefrom the said Hospital
whenever required to do so by the Superintendent, and if the said
obligors shall also pay, not exceeding Fifty Dollars for all damages the
said patient may do to the furniture, or other property of the Hospital,
in any one quarter, and for reasonable charges in case ofdeath;
and in case the said patient shall be removed from said Hospital by, or
at the request of us, or either of us, or by any other person or persons,
before the expiration of three calendar months afterreception,
then if the said obligors shall pay the board of said patient for thirteen
weeks, and all other charges on the books of said Hospital, all payments
for board and clothing to be made in advance, quarterly on the fifteenth
day of March, June, September and December in each year, and at the
time of removal, with interest on each bill from and after the time it
becomes due—then this obligation to be void, otherwise to remain in
full force and virtue.
full force and virtue.

# Report of the Executive Committee

OF THE

MEDICAL AND SURGICAL DEPARTMENT, WESTERN PENNSYLVANIA HOSPITAL.

PITTSBURGH, PA., October 1, 1893.

John A. Harper, Esq.,

President of the Board of Managers:

Dear Sir:

The full Reports of Treasurer, Superintendent and Medical Staff herewith presented, include such complete details of the financial condition of the Medical and Surgical Department of the Hospital, and of the work that has been done there during the year ending October 1, 1893, that any recapitulation by your Executive Committee is unnecessary.

While there has been a decrease in the amount of donations to the treasury for general expenses, yet there has been a large amount of money contributed for special purposes by kind friends who recognized certain needs of the Hospital. The heavy cost of grading and filling the grounds surrounding the buildings will be met from this source.

During the past year an unusual amount of indebtedness was incurred for improvements, which were absolutely necessary. Among these we note the erection of a plain barn and stable, consequent on the grading of the grounds, an assessment by the city for a new sewer on Twenty-eighth street, of about \$1,300, a new morgue, a new ambulance to replace one thought to be unsafe, the renewal of Insurance Policies for three years, and some extensive changes in the Medical wards of the east wings. When these improvements are paid for, your Committee hopes that nothing beyond ordinary repairs will be required during the current year.

The experience of thirteen months has proved that the system of nursing by pupil nurses of the Training School is not only more efficient, but much more economical than the old method.

The increase of receipts from board of private pay patients—\$6,361.52 over any preceding year—serves to show a growing conviction in the community that no private home, whatever may be its wealth and conveniences, can provide such constant skillful medical attendance with trained competent nursing, as a patient can obtain in a well equipped Hospital.

The Superintendents, the Medical and Surgical Staff, the Resident Physicians, the nurses and employes have been prompt and efficient in discharge of their various duties.

On behalf of the Executive Committee.

JOSEPH ALBREE, Chairman.

### FIRST ANNUAL REPORT

OF THE

# WEST. PENN. HOSPITAL TRAINING SCHOOL FOR NURSES.

The first year of the Western Pennsylvania Hospital Training School for Nurses is now completed.

In September, 1892, the School was opened with a Superintendent and three probationers. The work was begun very gradually. The wards, one by one, were taken charge of by the Training School Nurses, as the School enlarged.

Our province, however, was limited to the female wards and the male medical ward. At the expiration of eight months, the Surgical Staff sent in a request to the Board that the Training School should be extended to all wards.

The School now comprises thirty-four accepted pupil nurses, a night head nurse, and a Superintendent. During the year there have been two hundred and forty-eight requests for application papers. Of this number fifty-four were chosen to serve the probation month. Thirty-four were accepted and entered the Training School as pupil nurses. Three left voluntarily, and seventeen were rejected.

For the services of special nurses, the Hospital has received from the Training School \$467.00.

The wards of the Hospital are now in charge of pupil nurses, who have completed their first year's training. Previous to this, two graduate head nurses have had charge of the heaviest wards, and assisted in the practical instructions.

A diet kitchen has lately been equipped, for which the nurses and patients are mutually grateful.

The lectures during the past year have been as follows:

Dr. Le Moyne-Surgical Emergencies and Bandaging.

Dr. Daly.—Nursing in diseases of Chest, Nose and Throat.

Dr. Snively.—Medical Emergencies, Temperature, Pulse and Respiration, Hygiene of the sick room.

DR. HUTCHINSON.—Nursing of Insane and Nervous Patients.

Dr. Hechelman.—Nursing in diseases of Eye and Ear.

Dr. King.—Asepsis, Antisepsis and Disinfectants.

Dr. Lange.—Duties of Nurse in Obstetrics and Gynaecology.

Dr. Dunn.—Care of Lesions of the Skin, incidental to Medicine; Surgical Diseases.

Dr. Murdoch.-Duties of Nurse after Surgical Operation.

Dr. Emerling.—Anatomy and Physiology.

Dr. Wood.—Food, Digestion.

DR. Bennett.—Nursing in Obstetrics.

DR. WALKER.—Surgical Instruments and their care.

DR. LLEWIN.—Anatomy.

Besides the fund of knowledge received from these lectures, a systematic course of instruction is followed out by the Superintendent.

In behalf of the Training School, I wish gratefully to acknowledge the uniform courtesy of the entire Visiting and House Staff, for much kindness and instruction, and for their unfailing attention to sick nurses.

To thank the Superintendent for his consideration and courtesy. Mrs. Sawyer, for contributions to the nurses comfort in the Home.

In conclusion we would thank the Executive Committee for its hearty support through which we have been enabled to advance the work of the School, and bring it in one short year to its present state.

Respectfully submitted,

MARY MACMILLAN,

Supt. Training School.

In the past twenty-two years 27,480 persons have been cared for and of these, including soldiers, 17,083 were free, while 10,397 paid in full or in part.

The total cost was \$1,214,716.79; of this amount \$798,877.62 was raised by friends of the Hospital and citizens of Allegheny County, and \$415,839.17 by the State.

I would call your attention to the wonderful change and appearance of the grounds in front of the Hospital, to which we are indebted to our friend Mrs. Robert Pitcairn, who by her efforts secured a large sum of money for exterior improvements.

On January 13th of this year, the first of an annual series of complimentary benefits by the theatrical profession for aid of this Institution was held at the Alvin Theatre. Among the artists appearing on the occasion was Miss Marie Wainwright and her company, Mr. Nat Goodwin and his company, and the members of Mr. Harry Williams' company, of this city, all donating their services as well as Mr.

Chas. Davis who generously donated his beautiful theatre on the occasion and the sum realized amounted to almost two thousand dollars.

The services of the Staff and Resident Physicians can not be too highly commended. Enlarged responsibilities and increasing cares have been met with the most untiring devotion to their duties and nothing has been left undone on their part that could add to the efficiency of the Hospital service.

Time and space will not permit me to mention in detail the names of our many friends, but I can not close without speaking of one who for many years has brought joy and gladness by her presence to many poor unfortunates of this Hospital. I refer to Mrs. Samuel McKee.

Among the many contributions received during the year none were more acceptable than the following from the ladies of the different churches.

#### DONATIONS.

MISS DARLINGTON.—6 Ladies' Breakfast Shawls.

1st Presbyterian Church, Allegheny City.—68 Pillow Cases, 3 Bolster Cases, 20 Sheets.

MISSIONARY SOCIETY OF 8TH U. P. CHURCH, CITY.—6 Sheets, 12 Pillow Cases, 4 Night Dresses.

# Report of Staff.

#### To the Board of Managers of the

Western Pennsylvania Hospital.

#### GENTLEMEN:

We have the honor to submit the following report of our work for the year ending October 1, 1893:

Total number under treatment	2,281
Cured	1,563
Improved	241
Unimproved	108
Died	219
Remaining	150
	2,281

The attached table gives in detail the disease and injury, with the result in each case.

It will be observed that this year is no exception to the years that have preceded it, and that each succeeding year adds to the number of patients.

The growth of this Hospital should keep pace with the growth of the city. Pittsburgh is now a metropolis, and ours should be a metropolitan Hospital.

The Western Pennsylvania Hospital has a history of which all who have ever been connected with it may well be proud. Its facilities for giving relief to the sick and suffering up to the present time, have been sufficient to meet the wants of the community, but it has now become a question whether our present buildings will meet the wants of the future as they have of the past.

Hospital architecture has been greatly modified since our present building was erected. A better knowledge of the laws of health and disease has necessitated changes in the construction of hospitals, so that the physician may be able to guard against the entrance of infection, or stamp it out if admitted; and so that the surgeon may keep his wards and his wounds asceptic.

The location of our Hospital admits of a building being erected which would be sanitary in every particular, and since the grounds have been so beautified, by the generosity of a few ladies, we would like to see a building erected here which would be an ornament to our city, built and equipped after the most approved plan of modern hospital architecture. We believe that with such an hospital, the general administration would be more convenient and economical, patients would recover sooner, and that there would be fewer deaths. In this connection, we would refer to the value of this Institution as a place where instruction can be given to those engaged in the study of medicine, and in the nursing of the sick.

It will not be denied that the primary functions of an hospital is the care of the sick and injured; and while this is true, it is also true that this object can be better accomplished, and at the same time much additional benefit obtained, by taking advantage of the clinical material to be found in our hospitals for the purpose of teaching the practice of medicine and surgery, as well as the training of nurses in the care of the sick.

It is probably because of the mutual benefit to be derived, that most of the large Mctropolitan Hospitals, both in this country and in Europe, are managed in connection with some medical college, and also have a training school for nurses connected with them. In this manner the hospital is benefited by having connected with it physicians, surgeons and nurses, who, for the reason that they are also teachers in the branches which they practice, are obliged to keep themselves fully abreast with the times. The College and Training School is also benefited by being able to put in practice and illustrate before their students the methods taught in the didactic lectures. And so also is the community, benefited by having supplied to it physicians, surgeons and nurses, who have been taught and trained under the supervision of competent teachers. We have already experienced the benefit of the Training School for Nurses under its skillful Superintendent.

May we not indulge the hope that the Western Pennsylvania Hospital and the Western Pennsylvania Medical College may always preserve their present pleasant relations, and be mutually beneficial to each other, and to this community.

In making this report we are reminded, that during the year, our beloved colleague, Dr. James McCann, has been removed by the hand of death. His loss to this Hospital is irreparable, devoted as he was to its interests since its organization. He was untiring in his labors here, and died a martyr in his devotion to duty. It was while performing a surgical operation upon a charity patient in this Hospital that he received a wound, which ultimately resulted in his death. Dr. McCann's reputation as a physician and surgeon, together with his industry and loyalty to the interests of this Hospital, probably did more than that of any other one man to build up its reputation. His loss will probably be greatest to the poor charity patients who come here for relief. But it will be felt more, and he will be remembered longest by his colleagues who knew him best, and therefore loved him most.

In conclusion, we desire to express our appreciation of the courtesies extended to us by the Board, and satisfaction with the services rendered by the Superintendent, the Matron, the Resident Physicians, and other employes.

#### Respectfully submitted,

C. B. KING, W. SNIVELY,
F. LE MOYNE, W. H. DALY,

### RULES FOR THE ADMISSION OF PATIENTS

TO THE

#### MEDICAL AND SURGICAL DEPARTMENTS.

Applications for admission of patients may be made daily at the Hospital, to any member of the Executive Committee, or of the Medical Staff.

The patient, if able, should in all cases apply in person; if unable to attend, the application may be made by a friend, and if necessary, the patient will be visited by the attending physician or surgeon, who shall ascertain whether the applicant be a fit subject for admission.

Admission for free patients can only be obtained when beds are vacant, and by a certificate of the visiting Physician or Surgeon, countersigned by a member of the Executive Committee, and addressed to the Superintendent. Applicants shall engage to comply with the rules and regulations governing free patients. No persons shall be admitted to free beds except cases of acute disease, or recent accidents, but no cases of infectious or contagious disease, or syphilis, can be received, nor patients who have been inmates of other hospitals within three months before their application, unless by the consent of the House and Supply Committee; nor can any patient be retained longer than two months without a special vote of the Executive Committee. No infectious or contagious diseases can be admitted under the provisions of the Charter.

All persons suffering from recent accident or injury, shall be received into the Hospital without the usual forms of application.

Applications for the admission of pay patients shall be made to the Superintendent, who, in conjunction with the House and Supply Committee, shall take such securities as may be required.

The price of board and medical attendance shall be such as the House and Supply Committee may determine.

The following cases are considered ineligible to the Institution:

Those who, upon due examination, are considered incapable of relief.

Those who have complaints for the care of which other establishments have been provided.

Those who, wanting food and not medicine, are more properly objects of relief from Directors of Poor and public charity.

Patients becoming convalescent are to be discharged by the attending Physician or Surgeon as soon as possible, that their places may be filled by some other afflicted persons.

Patients giving a wrong representation of themselves, their circumstances, their disorders, or otherwise, to gain admission, and who, after being admitted, are found to have any disorder not considered proper, are to be discharged.

No charity patient is to be continued longer than two months, except upon the recommendation of the Medical Officers that a more lengthened period will essentially conduce to the patient's health; exceptions to this rule are those cases of lingering disease, where death is inevitable.

Union soldiers of the volunteer armies of Western Pennsylvania will be admitted to the Medical and Surgical Department of the West Penna. Hospital upon the recommendation of any Post Commander of the Grand Army of the Republic, or Colonel Commander of the Union Veteran Legion in Western Pennsylvania, provided that such applicant shall come within the regulations of the Hospital and shall be found to require medical or surgical treatment or care, upon examination by any of our Medical or Surgical Staff.

## ANNUAL REPORT

OF THE

## MANAGERS

OF THE

Western Jennsylvania Mospital,

∘ FOR 1893. •

MYERS, SHINKLE & Co., PRINTERS AND STATIONERS, No. 523 WOOD STREET,

# Contributions to the Western Pennsylvania Hospital.

It is desirable that contributions to this charity be sent to John A. Harper, President, or M. W. McMillan, Treasurer of the Hospital, though they are received by any one of the other Officers or Managers of the Institution,—and contributors should distinctly specify for which department of the Institution and to what purposes they desire their gifts to be applied, whether for present needs, or for the increase of the Endowment Funds.

#### BEQUESTS.

Bequests should be made in the corporate name of the WEST-ERN PENNSYLVANIA HOSPITAL," but the department for whose use the bequests are intended should be designated.

All Notices required to be served by law on the Solicitor of the Western Pennsylvania Hospital, to be addressed to

GEORGE SHIRAS, III, ESQ.,

100 DIAMOND STREET,

PITTSBURGH, PA.

For Regulations concerning Application for Admission of Patients, see pages 71–72 and 116–117.
